

# WAREHOUSE MOBILITY & AUTOMATION

*Tom Bevan – Presales Manager*

# AGENDA

- MobileNAV vs Tasklet Factory shootout
- Example Order to Pack & Ship Processes using different apps
  - MobileNAV
  - Tasklet
  - PowerApps
  - nHanced eCommerce
  - nHanced Order Management

A man in a black hat and vest, holding a revolver, stands in a dusty street. In the background, other people are visible, some wearing hats. The scene is dimly lit, suggesting dusk or dawn. A vertical red line is positioned to the left of the man's torso.

# MOBILE HANDHELD SHOOTOUT

*Who is the  
best handheld  
slinger in the  
west*

MOBILENAV

VS

TASKLET

Integration

- Both beautifully integrated into NAV/Business Central
- MobileNAV needs more config to get up and running out of the box.

MOBILENAV

VS

TASKLET

User  
Friendliness

- Tasklet is more user friendly and has a more well designed user interface
- MobileNAV can be made more user friendly, but requires some effort – however there are UI redesigns in progress
- Tasklet more “scan-friendly”
- MobileNAV is more “click-friendly”

MOBILENAV

VS

TASKLET

Hardware

- Tasklet has predefined list of supported scanners – some of which can be expensive
- MobileNAV works on almost any scanner, IOS, Android etc

MOBILENAV

VS

TASKLET

Feature Set

- Offline/Online
  - Tasklet built around the idea of being offline
  - Mobile NAV - can work in both modes, as well as an auto offline/online mode, but better online with wifi
- Tasklet is purely for Warehouse and some Manufacturing
  - But is very feature rich in WMS, eg barcoding, tote picking, pack and ship etc
- Mobile NAV works across the whole of NAV/BC
  - Eg WMS, Sales, Service Management, Timesheets, Jobs, Manufacturing or whatever

MOBILENAV

VS

TASKLET

Development  
Configuration

- MobileNAV is much easier to develop & config
- Things that you can change in MobileNAV UI would need code changes in Tasklet
- In MobileNAV – if you’ve done the dev in BC/NAV, you just expose the page to MobileNAV
- Tasklet is still very customisable, but you need to build the page process from scratch as it doesn’t communicate directly with NAV/BC – its via XML

MOBILENAV

VS

TASKLET

Implementation

- Both systems have a similar base implementation time
- Normally both recommend total 5-8 days to setup and install
  - Nb this is just for the handheld setup, not the whole WMS config

MOBILENAV

VS

TASKLET

Pricing

- Tasklet is a little bit more expensive
- 10 user basic example
  - Tasklet: £603 pm Inc Support + one off £1372 for MobiControl and standard installation
  - MobileNAV: £400 pm Inc Support

MOBILENAV

VS

TASKLET

Overall

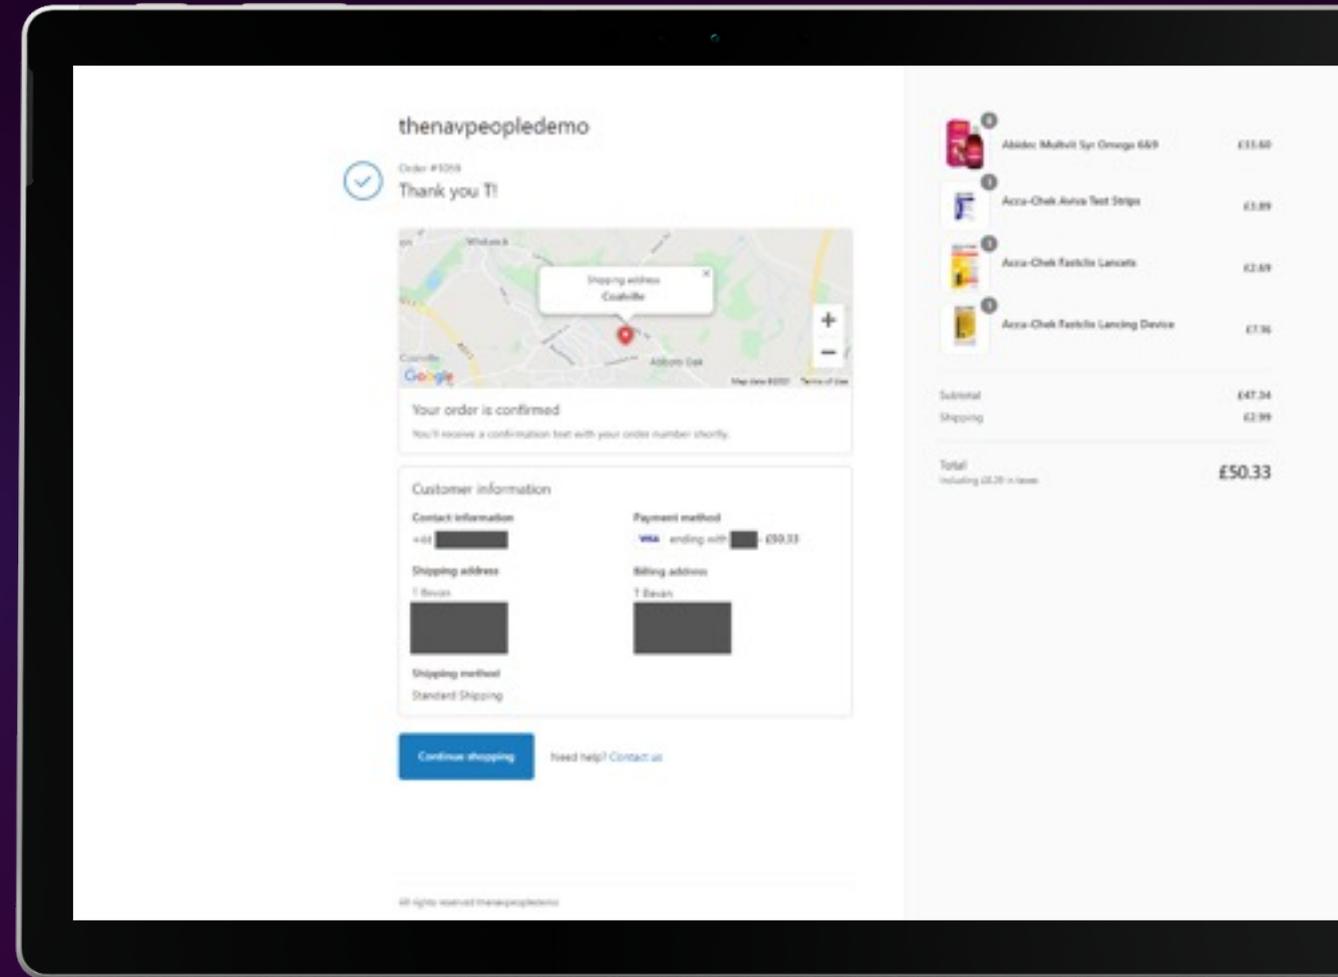

- It's a draw – they are both brilliant
- Tasklet is better if you have a relatively standard WMS process and want something user friendly
- MobileNAV is better if you need more than WMS or have a need to heavily customise it or have non-standard processes

# SUMMARY

- Both are brilliant solutions that we sell a lot
- Both have benefits over the other
- Have a look at both
- We'll help you decide based on your requirements

# PROCESSING ECOMMERCE ORDERS

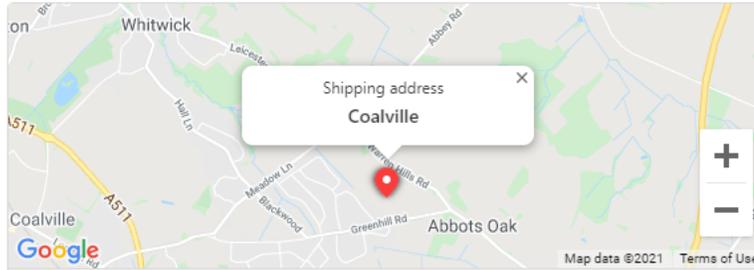

- nHanced eCommerce
- nHanced Order Management
- nHanced WMS
- MobileNAV
- PowerApp Packing Bench

Order #1059

Thank you T!
