Continia Finance

Free Essentials Module

- Start with the essentials—free of charge!
- Access core features without any cost
- Add additional modules with advanced features as needed—only pay for what you use

8 modules for specific finance tasks

- Enhance your capabilities in Business Central
- Expand your operational scope with tailored finance solutions
- Automate manual processes to streamline complex financial tasks

BUILT INSIDE your Business Central

- Easier for finance teams to learn and use
- Seamless integration with your workflow—better business process support
- Attractive pricing—low setup and implementation cost

The Essential module

The first thing to install on a new Business Central

CSV ports

The tool to quickly import master data or continues import/export templates, such as master data or import salary data to a journal.

Enhanced Application

Visual enhanced application as well as more columns for faster application in the daily workflows.

Dimensions on system postings

Unlike standard BC, Continia finance creates the dimensions when using system accounts either the dimensions on the line or the account

Ledger Entry Comments

Allows the usages of comments on lines to be viewed after posting.

VAT key Codes

Instead of being annoyed of all the data to fill out when changing ex a vat code, then create fast VAT codes with a short name and fill out all data in one fast key.

Fast posting codes

Typing the same information many times a day or month.

Create fast posting codes with accounts, text dimensions or even amount for fast daily work rhythm

Balance Confirmation letters

Once a year speedup the work with sending out balance confirmations to the customers and vendors for year end accounting.

Date formula Posting Periods

Set a date formula to automatically shift the the Allow Posting From and Allow Posting To dates. Also available for deferrals and can be setup on user level as well.

Seven additional modules

Pick and choose from seven additional modules that help with various financial tasks

Associations

Combine several customers or vendors into a single entity and simplify reconciliation. You can also reconcile customers and vendors.

Extended Fixed Assets

Manage and gain a comprehensive overview of your assets' status and lifecycles.

G/L Open Entries

Effortlessly create, manage, and reconcile your G/L open entries.

Installment Payments

Enhance customer and vendor payment flexibility with invoice splitting.

Extended Financial Reports

Streamline your year-end financial reporting with optimized displays and lists.

Multi-Level Payment Discount

Encourage quicker payments with a range of discount options and flexible payment dates.

Treasury

Keep track of payment-related information for multiple companies in a group.

Automatically

Continia eDocuments

Mandatory for UK businesses 1st of April 2029
