

**Make Money**

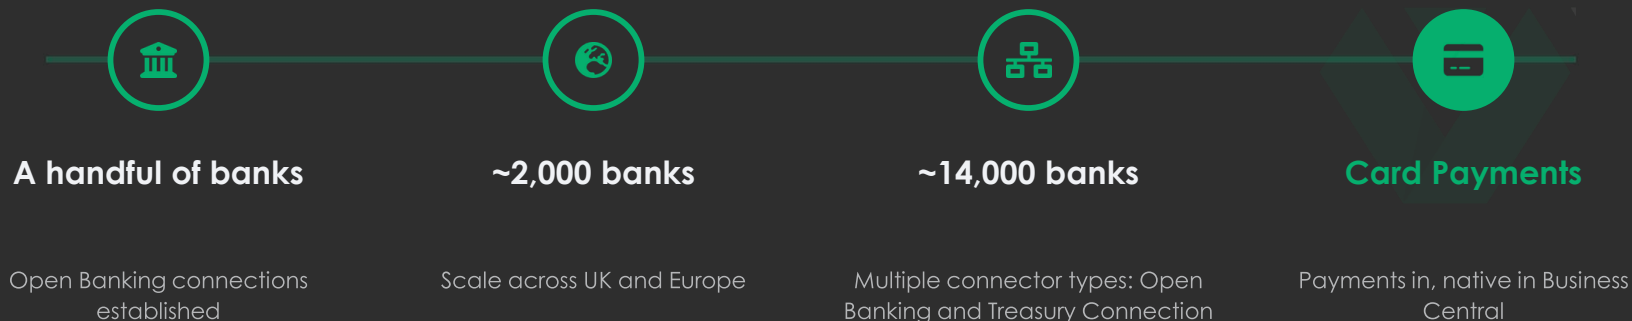

**Moves:**

**Card Payments**

Microsoft Dynamics 365 Business Central

# Our Journey: From Banks to Card Payments

*"Completing the payments picture inside Business Central."*

# | Why Card Payments Now

## "Payments in"

becomes native in Business Central.

### **Finance control**

Collect card payments without leaving BC

### **Accurate reconciliation**

Gross and fee posting keeps the ledger clean

### **ERP-native workflow**

No third-party portals, no manual re-entry

# What is Yavrio Card Payments

Card payments become **native in Business Central**.  
Collect, post, and reconcile within your existing BC  
workflows.

Accept card payments from  
invoices and sales orders

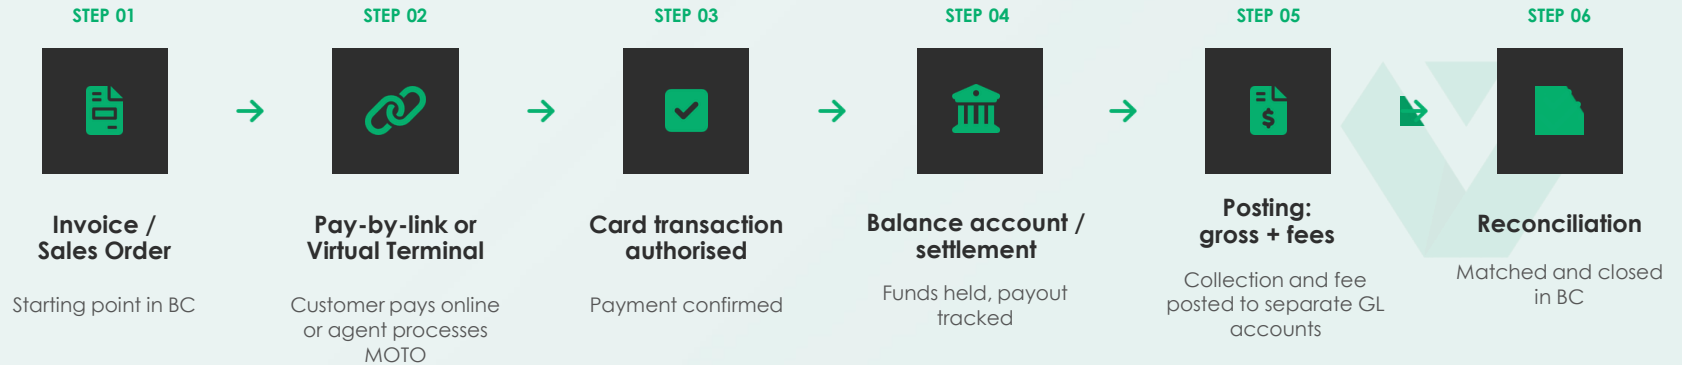

Post gross amount and fees  
separately to the correct GL  
accounts

Reconcile settlements via a  
dedicated balance account

# How It Works: End-to-End Flow

# Activation: How to Get Started

## Setting up Card Payments in Business Central

1

### Find the setup page

Search "Card Payments Setup" in BC

2

### Enter your Account Holder ID

Provided by Yavrio during onboarding

3

### Select your balance account

Set up a dedicated bank account in BC for card settlements

4

### Test and go live

Run a test transaction before enabling for all users

# Yavrio Platform: Where Cards Fits
